TRIAL BY LIGHT

DAMIAN COCCIO

Trial by Light features 10 original solo bass compositions on the five string fretted and four string fretless basses. Trial by Light is designed to inspire the imagination and create a sense of appreciation and intrigue. With beautiful melodic bass guitar and no overdubs, this album was composed and recorded live over a period of 8 months. The creative use of loopers and carefully chosen effects creates an immense, moving soundscape. The effects used on this album are: TC Electronic Ditto X2 Looper, Eventide H9 Max, and the Strymon Timeline Delay. The basses used on this album are made by Fodera Guitars in NYC. Thank you for purchasing Trial by Light.
